

CALLING STUDENTS!!

FOR THE GLOBAL ENERGY TRANSITION

Register now for the :

CLEAN ENERGY AGENTS

ONLINE PROGRAMME

World leaders have signed the Paris Agreement last April 22nd, promising they will keep the world's temperature well below 2 degrees warming. But at the same time we are burning more fossils than ever before.

This is an open call for students of all levels around the world to start the global clean energy transition. We are looking for students committed with the environment, their communities and their future.

It's our time to break free from fossil fuels and make the global energy transition happen before 2025!!

What are Clean Energy Agents?

- Clean Energy Agents are new change agents who will bring the change we need to stop the climate crisis and protect the future of the young ones in the world.
- They will gradually but massively stop fossil fuel consumption and start a global transition to clean energies.
- Their aim to protect our future and the future of the entire young generation. They know that the only way to ensure a good quality future is by cutting fossil fuels from our lives and turning to clean energies.
- Clean Energy Agents are committed to their future and their movement! They are active agents during the whole year, working hard to achieve specific goals related to starting the transition to clean energies and keeping fossil fuels in the ground, such as:

Switching your schools to clean energy!

**[Register now](#) for our FREE online programme,
and become a Clean Energy Agent!**

Join our intensive online training/action programme where you get up to speed on clean energy, plug into a global network of changemakers and start to make a change in your country, beginning in your own school. We will give you the information, the tools, the know how, the guidance and motivation you will need to manage your school's transition.

PS: Teachers, parents and principals are welcome, too!!

Registrations open until: MAY 22th 2016
