

Clean Energy Agents Frequently Asked Questions

1. Is the Clean Energy Agents programme only about clean energy?

Mainly, but not only. Our focus IS on renewable energy and your own school in the activities we closely accompany. But we will also be looking at a number of other topics that are important for the global energy transition (resisting fossil fuel extraction, divestment, mobilizing your friends, planting trees to buy us time, media work, Climate Strike etc.) and encourage you to develop these further on your own.

2. I have my final exams coming up. Can I join the programme later?

We are making an effort to generate as much content as possible in a permanent form, so that others can follow in the footsteps of the first generation of Clean Energy Agents. If you are unable to join now, you will miss the opportunity of networking with the other CEAs, the skype conferences and the direct coaching, but you will still be able to access many of the materials, such as powerpoint presentations, spreadsheets and recorded webinars later on.

3. Will there be another round of the Clean Energy Agents programme?

Maybe. In any case, a big part of the materials from the programme will be available online for everyone to use freely. If the programme goes well, we may repeat it next year.

4. I am not a student any more. Can I become a Clean Energy Agent?

Yes, definitely! Because we are focussing this year on getting schools to switch from fossil to clean energy, you may want to get in touch with a nearby school and work with them. Or your company, or another institution. Definitely do apply if you want to help start the clean energy transition!
