

Calling students around the World for a global **CLIMATE STRIKE** on November 30, 2015

Are you still going to school—doing your homework—while
they are **burning our future?**

Every day, governments and companies are extracting and burning more and more fossil fuels. With them, ***the future of our planet is also going up in smoke.***

For the last 25 years, the older generations have been negotiating to stop this. *Their outcomes: broken promises.* They promised to cut CO₂ emissions **but they have not done their homework.** Instead, they keep digging and drilling for more coal, oil and gas.

We are not going to sit back and watch this any longer!

Climate Strike is a wake-up call to our generation.

We will be at least a million students doing climate actions together!

Register at climatestrike.net and become a part of Climate Strike!

We need your voices, hands, hearts and smarts!

- ★ Let's keep the fossil fuels in the ground
- ★ Let's make the transition to 100% clean energy
- ★ Let's help climate refugees

*We cannot wait any longer.
It's our time to create history!*

Skip School. Join your classmates, friends and people in your community and undertake an action together. This is the start of a network that will take even more actions in future! It's time to create **the future we want**, to stand hand-in-hand as we face the biggest challenge of our lifetime – **the climate crisis**.

Suggested Actions

- » Give a presentation on climate change in your class/school/community
- » Learn about climate issues through documentaries or invite speakers
- » Join a skype conference with the young climate activists gathered in Paris
- » Install solar panels on your school
- » Perform arts like painting, music, short plays, poetry, dance, etc.
- » Urge your school/college to divest from fossil fuels and go renewable
- » Support existing climate struggles in your region
- » Organise peace march, tree plantation, etc. near a fossil-fuel industry
- » Meet politicians who will take some important decisions for our future and raise your concerns to them

Who?

You – are the most important participant! Together, with your fellow students from school to university. **We look forward to your involvement.**

Even adults are invited to skip work and join.

We're a group of young activists from five continents who met at an international youth conference in May 2015 and got the ball rolling.

The turn is yours now! Let's make history!

Save the Date!

Monday, November 30, 2015
on the first day of the UN Conference
on Climate Change - COP21 - in Paris
when the world leaders will meet to
frame our future.
